Expertise for Success

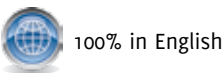

Being successful in a globalising world demands a genuine understanding of different business habits, culture, languages and the laws of a given region. Europe is as diverse in its legal systems as it is in its various languages. However, a unifying element increasingly bridges the gap between different approaches and legal traditions – the law of the European Union.

Course Structure

EBS Law Summer is suited to all levels of expertise in EU Law. The course begins with an intensive, one-week introductory course on the law of the European Union (4 ECTS) to provide students with the necessary foundations for the programme. Students may then choose from 6 different electives, each dealing with more detailed questions of EU Business and Commercial Law.

The electives are complemented by corresponding site visits (e.g. European Central Bank, European Court of Justice, European Parliament) and each is assessed by written examination. Students without previous knowledge of EU Law can delve into the topic during a relatively short period, whereas students having studied some basics of European Law can broaden their knowledge in the specific electives.

Credits

Students can earn between 10 and 16 ECTS credits depending on the number of electives selected. All students are required to attend the introductory module and attend a minimum of 3 electives. The introductory course on the law of the European Union is comprised of 1400 minutes classroom teaching and is worth 4 ECTS. Each elective is worth 2 ECTS and comprises 700 minutes of classroom teaching.
