

Book title:

# INTERNATIONAL ENVIRONMENTAL LAW: CONTEMPORARY CONCERNS AND CHALLENGES

*Papers presented at the First Contemporary Challenges of International  
Environmental Law Conference in Ljubljana*

Edited by: **Dr. Vasilka Sancin**, Assistant Professor of International Law,  
Faculty of Law, University of Ljubljana

International environmental law today faces a broad spectrum of global challenges from sufficient levels of protection of biodiversity, forests, marine environment and outer space to integration of multilateral environmental agreements, concerns of international adjudication and the confluence of patent law and foreign investments with environment. These issues and others, such as the protection of the environment in peace operations, the responsibility of transnational corporations for environmental protection, green economy and energy efficiency are critically addressed in this book and innovative solutions are provided both by international legal experts and environmental scientists. The book is thus a unique example of an interdisciplinary response to the global environmental challenges of humankind.
