

# **International** **Experience** **Internationale**

Did you know that if you are a Slovene citizen between the ages of 18 and 35, you could have the chance to work legally for up to one year anywhere in Canada? Whether it is to gain valuable international work experience or to finally take that trip of a lifetime you've always imagined, why not become one of more than 35,000 young participants from around the world who travel and work in Canada with our program each year?

Canada has negotiated agreements with several countries including Slovenia and has partnered with various international organizations. Through these agreements and partnerships, international young participants can easily obtain a temporary work permit and gain professional and personal experience in Canada.

The three categories under the International Experience Canada provide you with the opportunity to visit Canada as a tourist and work if you wish to supplement your resources; to gain serious international professional work experience in your field of expertise; and to fulfill part of your academic curriculum in an international environment.

An amazing work experience abroad is closer at hand than you think.  
Let us help you put your plans into action!
